

JAYWEL JAVIER

113 Velasquez St. Bangiad, Taytay, Rizal 1920 | jlewyaj@gmail.com | +639614591458

Versatile Python Developer with a strong background in backend engineering and data pipeline automation. Experienced in architecting scalable server-side systems, designing high-performance APIs, and engineering robust ETL workflows using Pandas and NumPy. Proven track record of bridging the gap between raw data engineering and secure, high-traffic application logic while optimizing workflows for maximum efficiency and speed.

EXPERIENCE

October 2022 – October 2024

Python Developer | Collabera Technologies Private Limited Inc. | Makati City

Engineered scalable backend systems and high-performance APIs for data-driven applications. Designed server-side logic and database schemas, ensuring seamless front-end integration. Automated internal workflows and implemented robust security and performance tuning to optimize large-scale data processing.

April 2021 – October 2022

Python Developer | Intelegencia BPO LLC. Corp. | Antipolo City

Developed and deployed custom Python scripts to architect efficient data engineering pipelines and automate complex ETL processes. Maintained data integrity while using Pandas and NumPy to engineer advanced cleansing and validation scripts that accelerated processing. Optimized end-to-end workflows with reliable error-handling to support scalable architecture for business intelligence and reporting.

November 2020 – March 2021

Web Developer | DNA IT Solutions Inc. | Angono, Rizal

Developed and maintained an e-commerce platform using Python, ensuring seamless server-side logic and optimal database performance. I focused on writing efficient code to streamline online transactions, managed secure data workflows, and implemented regular updates to enhance system reliability and user experience.

May 2019 – October 2020

Software Engineer | Philsmile Inc. | Quezon City

Engineered scalable school management systems with a focus on developing automated grading modules and high-performance APIs. Designed robust database schemas to handle complex academic logic and large-scale data processing, streamlining report generation and ensuring the secure, seamless integration of student records.

EDUCATION

2015 – 2019

Bachelor of Science in Information Technology | Polytechnic University of the Philippines

- 2nd Best Capstone Project: Polytechnic University of the Philippines Guidance Counseling System

SKILLS

- Python Programming
- Data Engineering & ETL Pipeline Automation
- Backend Architecture & Server-Side Logic
- API Design & Integration
- Performance Tuning & Workflow Automation
- Database Management & Schema Design
